Hardik

LinkedIn: https://www.linkedin.com/in/hardik8/ Email:hardikkumar2583@gmail.com
GitHub: https://github.com/Har-dik25 Mobile: +91-7878600960

SKILLS

Languages: Java, Python, SQL, JavaScript, HTML, CSS
Frameworks: Flask, Fast API, NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn, Tensorflow, Google ADK, PyTorch, React, Vite, NLTK
Tools/Platforms: MySQL, MongoDB, Git & GitHub, Docker, Azure, Power BI, Hugging Face, LLMs, Agentic AI, APIs, LangChain, CI/CD, Supabase, ChromaDB, SQLite, BM25, Sentence-Transformers
Soft Skills: Quick Learner, Team Player, Leadership, Adaptability

INTERNSHIP

Applied AI & Intelligent Systems Intern | Futurense Technologies | Certificate — Jun '26 – Jul '26

- Designed applied AI solutions using machine learning workflows and intelligent system design patterns to address real-world automation and data challenges.
- Engineered AI/ML pipelines using prompt engineering, embeddings, and intelligent architectures to improve model inference, latency, and response reliability.
- Architected production-oriented AI system design, exploring full-pipeline workflows spanning data ingestion, preprocessing, model inference/fine-tuning, and API deployment.

Data Intern | Futurense Technologies | Certificate — Jun '25 – Aug '25

- Developed enterprise-ready ML models to forecast lead volume and conversion rates.
- Cleaned high-volume marketing data to support end-to-end funnel and cohort analysis, ensuring near-perfect data consistency across reporting tools.
- Delivered Power BI dashboards to visualize funnel drop-offs, identifying 15% critical inefficiencies in CPL focused optimization strategies.

PROJECTS

Fake News Detection System | GitHub — April '26 - May '26

- Pioneered a production-grade detection platform using PyTorch to process and classify over 72,000 political and journalistic articles with precision-focused results.
- Crafted a hybrid AI architecture that combines a BERT Transformer with a BiLSTM network, and further boosted accuracy by integrating classical NLP features like sentiment analysis and POS tagging.
- Prioritized Explainable AI (XAI) by implementing a custom attention mechanism that generates live visual heatmaps on the frontend, showing exactly which words triggered a "Fake" classification.

Tech: Python, PyTorch, HuggingFace (BERT), NLTK, FastAPI, Docker, Scikit-Learn, JavaScript/HTML/CSS

Samvidhan AI | GitHub — Jan '26 – Feb '26

- Built a Hybrid RAG Retrieval Pipeline combining ChromaDB dense vector search, BM25 sparse search, and Cross-Encoder reranking over 3,800+ legal statutory chunks for sub-second, high-accuracy query retrieval.
- Devised a Zero-Hallucination Extractive Synthesis Engine delivering verbatim statutory breakdowns, penal liabilities, and automated IPC ↔ BNS cross-mappings with sub-20ms synthesis latency.
- Created a Full-Stack Legal Research Workspace in React and FastAPI featuring real-time response streaming via SSE, interactive legal knowledge graphs, and SQLite-backed session persistence.

Tech: Python, FastAPI, React, ChromaDB, Sentence-Transformers, BM25, SQLite, Vite

CERTIFICATES

Oracle Cloud Infrastructure Certified Generative AI Professional | Oracle | Certificate — Sep '25
Oracle Cloud Infrastructure Certified Data Science Professional | Oracle | Certificate — Sep '25

ACHIEVEMENTS

5 Star on Hacker Rank in Python and SQL. — Oct '25
Participated in the Google Gen AI Exchange Hackathon and Smart India Hackathon. — Sep '25

EDUCATION

Lovely Professional University — Punjab, India
Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.00** — Since Aug '23

ACI Senior Secondary School — Jhunjhunu, Rajasthan
Intermediate; **Percentage: 83.80%** — Apr '21 – Mar '22

ACI Senior Secondary School — Jhunjhunu, Rajasthan
Matriculation; **Percentage: 82.17%** — Apr '19 – Mar '20
